Secret practice began yesterday afternoon and from now until the Washington game will be a regular feature of the football program. Light scrimmage was started yesterday, but before long it had developed into one of the hardest-fought mix-ups of the season. The men did not leave the field until ten minutes past six.

Schulte spent most of the time trying out his tactics. The men are not showing up as well as he expected and he is having trouble selecting the proper combination. All of the candidates are light and can carry the ball with proper interference, but so far none of the men have shown great ability at getting the opponents out of the way.

Groves, Marshall, Collins and Haines were the men looked over most carefully by the big coach yesterday and though they showed their lack of experience and knowledge of team-play,

they will probably be worked together frequently in an effort to find the combination of weight, power, speed and co-operation that Schulte is trying to find for the 1916 backfield.

The whole list of backs will be put through a hard grill this week against the freshmen and against Central while next week will be devoted to polishing the play for the real test with Washington. This game is the key to the entire schedule and the Tigers realize that if they can defeat the greatly strengthened Pikers they will be well on the way to a successful season.

Today the freshmen will receive attention. The work of the line was ragged in Saturday's tryout and Schulte wants to close up some of the gaps in the forward line of defense. The men are showing fight but seem to lack the experience and skill necessary to hold the opponents and to open up holes for their own backs.

The freshmen will get another short trial against the veterans today and expect to be in shape to give the University a real game on Thursday.

How do your cigarettes treat you AFTER you smoke them?

(This is a test that few cigarettes can stand up under)

Many other good cigarettes besides Fatimas taste mighty good—WHILE you are smoking them. Fatimas are not the only good ones. Although Fatimas taste so good that they continue to outsell any other cigarette costing over 5c.

But Fatimas deliver something more than good taste. They will give you cigarette comfort. Comfort when you are smoking them and comfort AFTER you smoke them.

While you are smok-

ing them, they will feel cool and comfortable to the throat and tongue. And AFTER you smoke them—even though you may smoke more than usual—they will leave you feeling as you'd like to feel. No heavy or "head" feeling—none of that "mean" feeling of having smoked too much.

All this is the reason why Fatimas are called a SENSIBLE cigarette. Yes—some day you will try Fatimas. Why not do it today?
